

Do You Want to Make a Difference?

A leading rural NGO, [Nimbkar Agricultural Research Institute \(NARI\)](#), in western Maharashtra is looking to hire 3-4 young engineers (Mechanical/Chemical stream) to help run it by developing technologies for rural areas. This is an excellent opportunity to gain experience in social entrepreneurship.

We are looking for engineers (B.Tech/M.Tech) who have excellent knowledge of engineering, flair for working with their hands and a missionary zeal to change the world specially the lives of rural poor through technological innovations. The engineers so hired will be called the **Bajaj Fellows**.

The candidates will work on the following projects:

1. Pilot project of [solar powered water purification system](#).
2. Mechanization of the process of [making syrup from sweet sorghum](#).
3. Spreading of [diesel lanstove in rural areas](#).
4. Running short courses in [Bajaj Center](#) for sensitizing corporate managers for rural development.

The candidates will work directly under [Dr. Anil K Rajvanshi](#), a [notable alumnus of IIT Kanpur](#).

This is not any other job but a mission. However the selected candidates will be paid a decent salary and given a free place to live on the campus.

If you are interested then please apply to; nariphaltan@gmail.com with subject heading "Want to make a difference".

Your application should contain the following:

1. Detailed CV.
2. Statement of purpose on why you feel you are suitable for this mission. This should include details of your creative projects/works in any field.
3. Names, phone numbers and emails of three professional references (could be your professors).

Please note that we are looking for very creative individuals who after working for 4-5 years at NARI will have a shot to run this organization.
