Structure of talk

- Introduction
- What is thought
 - Its possible origin
 - Its structure
 - Its transmission
- Knowledge perception
- Interaction of thought and matter
- Happiness and sustainability
- Death and reincarnation–continuation of the cycle

Introduction

- ❑ Mankind's interest since ancient times in nature of human mind. Thought as a signature of mind.
- ❑ Mostly philosophers discussed about it and tried to show how God created us in his own image.
- ❑ Recent developments in brain research provide us a possibility to understand thought, mind and consciousness.
- ❑ One of the greatest scientific/spiritual treatise on mind and thought control is ancient Patanjali's Yoga Darshan. However sage Patanjali was silent on origin of thought.
- ❑ We will make an attempt to understand what is thought, its origination and transmission.

What is Thought?

- It is a [hologram produced](#) by firing of neurons. > 100 billion neurons.
- Dissipative structure and synchronization. Firefly type sync? Large number mathematics needed.
- [The director 'I'](#) provides energy and helps in keeping the thought in the vision field. Concentration.
- MRI scan shows different parts of brain used for different thoughts. Location of memory ? MRI interference in thinking ?
- However deep thought maybe produced when almost 100 billion neurons fire together in a laser type action for a long time. It is *Sanyam* of Patanjali Yoga Darshan. May exist in higher dimensional space-time continuum.

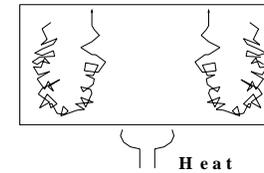

Fig. 1 (b)

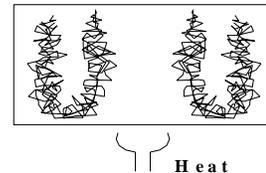

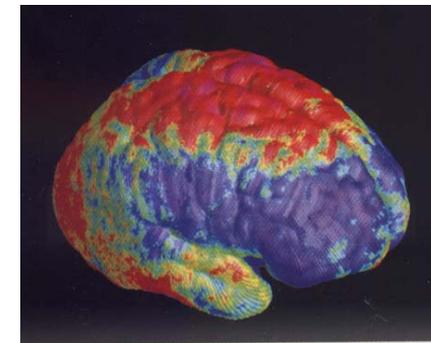

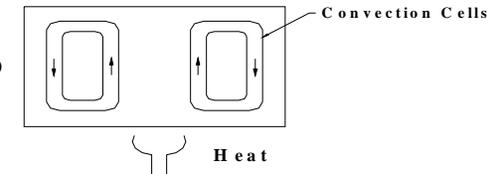

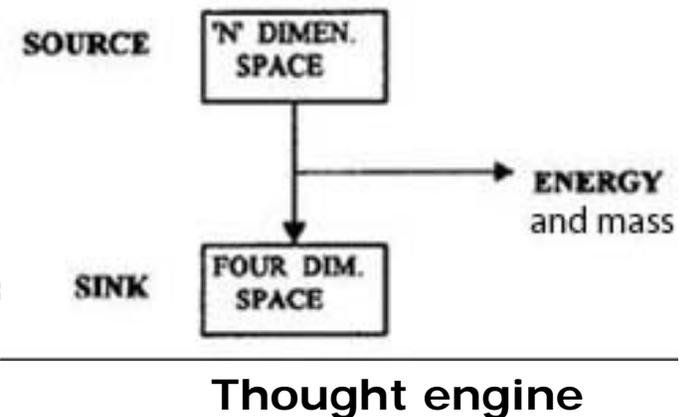

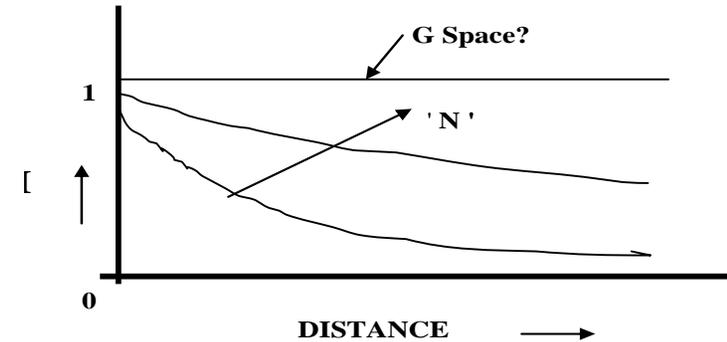

Fig. 1 (c)

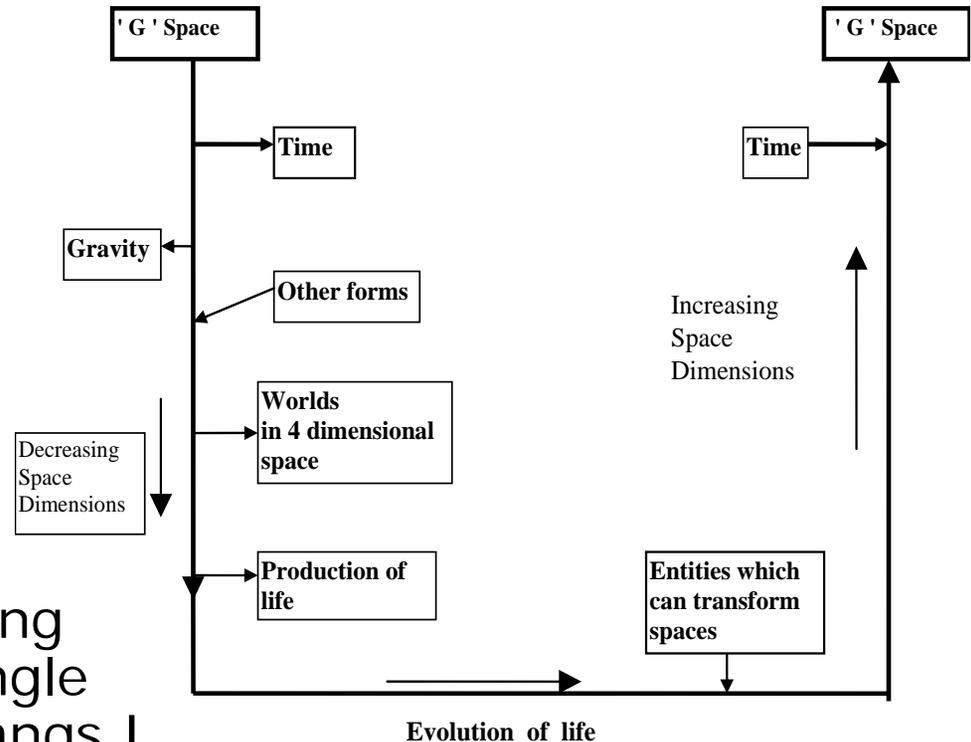

Nature of higher dimensional space

- ❑ The mundane thought exists in 4 dimensions and dissipates very rapidly.
- ❑ Deep thought is a very stable structure and exists in [higher dimensional space](#).
- ❑ It is rigid. Hence has memory.
- ❑ Memory as Knowledge space (KS)?
- ❑ Energy and matter flow via “Thought engine”. Production of matter from thin air?
- ❑ Quantum jump among dimensions?
- ❑ [Different realities](#) in different space dimensions.
- ❑ Highest dimension is ‘G’ (God space?)

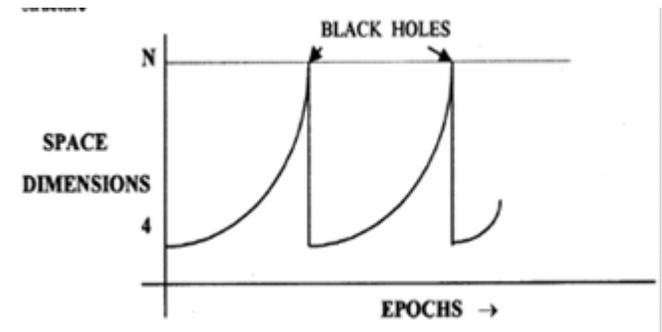

Evolutionary model

- ❑ When the space reaches 'G', time gets sucked in. Is 'G' *Akash* ?
- ❑ 'G' space always exists. Timeless. Is it God?
- ❑ Time is life and vice versa.
- ❑ Duality is when time exists.
- ❑ Thus mini universes are being formed continuously. No single big bang but many small bangs !
- ❑ Production of [species to maximize space filling!](#)
- ❑ Proliferation and decay of species is natural.
- ❑ Time ⇔ Space ⇔ Energy ⇔ Knowledge. Knowledge is time dependant and not person dependant.

Knowledge perception

- ❑ Perception of knowledge via knowledge space (KS). Passage of earth through it. KS is continuously updated.
- ❑ Thought interaction with knowledge template via lock key mechanism. Prepared mind does this via *Sanyam* and Yoga. [Great discoveries plucked from space](#). Time dependant only.
- ❑ Powerful mind can identify itself with any object and get its complete knowledge. Powerful information processor. Ability to get spiritual powers. Removal of memory and hence change of karma possible.
- ❑ Deep thought brings happiness. Pituitary gland stimulation?
- ❑ Knowledge is never destroyed. It gets transformed.
- ❑ Space closure when all living beings attain the final knowledge. The cycle continues.

Thought and matter

- ❑ Large amount of psychokinesis data exists worldwide.
- ❑ Possible only when deep thought interacts with matter. Production and annihilation of matter via thought engine.
- ❑ [Deep thought and gravity](#) may have similar characteristics. Both are geometric in nature.
- ❑ Alpha waves $\nu = 8-12$ Hz. Standing wave in earth with $R_e = 6400$ km. Relationship geometric or EM ?
- ❑ Pyramids and mountains as thought antennas? [Trees](#)?
- ❑ Possibility of life evolution when certain size molecules interact with gravity. Spine and hair as antenna?
- ❑ Planetary effects on transmigration of soul. Vivekananda, Ramakrishna, Bhishma Pitamah, etc. examples. Origin of astrology?

Happiness and sustainability

- ❑ [Happiness](#) is a state of mind. You start feeling happy when you become internally secure.
- ❑ Deep thought or Sanyam helps in creating internal calmness and security. Great discoveries, works of art and music create goose pimples.
- ❑ This internal security also helps us become less greedy for materials and resources. This is the genesis of sustainability. May lead to [corruption less society](#).
- ❑ [High Technology + Spirituality should be the model of development](#).
- ❑ With the reduction or removal of greed the environment can be made better.
- ❑ Purpose of life? Personal happiness and giving [back something to the society](#). This is full life.

Death and reincarnation

- ❑ [Nature of 'I' and its death](#). Modification of 'I' and maybe its complete removal by Yoga. Liberation ?
- ❑ Removal of 'memory' or 'I' from senses is painful. Death as [memory switch transfer](#). User name and password? Yoga helps in withdrawal from senses. *Kundalini* raising does the same thing.
- ❑ Nature of "body form" after death ? Being "becomes" only with body. Loss of "body form" and fear of unknown gives fear of death. What happens to body form? Change of space?
- ❑ Birth by chance or else willed very strongly; Vivekananda, Buddha, Ramakrishna etc.
- ❑ Evolution of species. Rivulets into ocean. Hence loss of species is natural.

Death and reincarnation (contd.)

- ❑ Transfer of memory from one species into another is possible. Mediated by karma? Karma \Leftrightarrow memory? Yoga can remove it.
- ❑ Memory or “soul” either earthbound or can go to other planets (great souls?). [Tunneling of soul](#). Guided by gravity of planets. Energywise simpler. Knowledge seeding?
- ❑ Concept of [heaven and hell](#)?
- ❑ Fate of knowledge after death? Never destroyed. Goes in hard form (books, tapes, teaching others, etc.). In soft form it goes in KS.
- ❑ Becoming personally happy and helping increasing the knowledge of the society is full living. Leads to happy ending.

Thank you
